Personal Profile

I am a dependable and self-motivated student with a desire to acquire new skills and develop my understanding of the STEM field. Whilst working on various projects, I have gained many skills such as computational thinking that assists me in everyday life and when approaching a more professional project. I am striving to establish a career in a challenging industry utilising my developing skill set.

Experience

- **Work Experience** - Ipeco Holdings Ltd – (04/07/22 – 22/07/22)
  - I worked independently and collaborated with the team to come up with ideas and solutions to a given problem.
  - I planned and built an app to increase productivity and efficiency within the business.
  - Used the following technologies: HTML, CSS, JavaScript, XML, SAP, OpenUI5, Git and more.
- **Junior Business Systems Developer –** Ipeco Holding Ltd – (17/07/23 – 01/09/23)
  - By following the user requirements I was given, I redeveloped a landing page for select internal tools and apps. Doing this, I was able to create a UI which included all the necessary features.
  - I used the .NET framework to begin developing a web application to interact with and view a database used for a specific manufacturing process.
  - I was able to present my solutions and designs to the Business Systems team and other department managers where I gained positive feedback and useful pointers on how to continue development.

Education & qualifications

- **Thurstable School –** GCSE Grades 2022
  - Computing – 9
  - English – 8
  - English Literature – 7
  - German – 8
  - History – 8
  - Maths – 8
  - Resistant Materials – 8
  - Science – 9/9
  - Sport National BTEC – Level 2 Merit

- **Colchester Sixth Form College** – Predicted A-Level Grades for 2024
  - **Computer Science** – A
  - **Mathematics** – A
  - **Business** - A*

Projects and Skills

- Some of my core skills include:
  - Intermediate Python and JavaScript Programming
  - Effective computational thinking
  - Strong mathematical ability
  - Basic C++ and Arduino knowledge
  - Competence in Microsoft Office

- Some of my key projects are:
  - Completed a course for a Level 5 Diploma in Web development by Shaw Academy.
    - Through lockdown I consistently worked through this course alongside my online lessons.
    - This taught me all components of full stack web development.
    - I practised these skills by building the base of an ecommerce website.
  - Made an Arduino based Score Counter.
    - Using C++ I coded a score counter which allowed you to press a button and the score increment.
    - This was displayed on an LCD display and feedback was given through LED lights.
  - Created a 2D multiplayer shooter game.
    - To create a backend for my game I used NodeJS and ExpressJS.
    - Used p5js to create graphics to show the game to the player.
    - Was able to get the client and server side to communicate using SocketIO.

Hobbies and Interests

Due to my passion in the tech industry I both enjoy keeping up to date with the latest technologies and playing video games allowing me a creative yet often strategic thought process. Alongside this, I like developing my skills as a beginner/intermediate level programmer and enjoy working on projects to consolidate my knowledge. I also enjoy going to the gym 4 to 5 times a week improving both my physical and mental health.
